

Business Problem Statement

Vrinda Store lacks a structured, data-driven understanding of its 2022 sales performance, customer behavior, and channel effectiveness. Without clear insights into which customer segments, regions, product categories, and sales channels contribute most to revenue, the business is unable to make informed strategic decisions.

The key problem is to analyze historical sales data and identify actionable patterns that can help Vrinda Store:

- Improve customer targeting
- Optimize sales channels
- Increase overall revenue in 2023

Project Deliverables

The project delivers the following outputs:

1. Interactive Excel Dashboard

- Monthly Sales vs Orders analysis
- Gender-wise sales distribution
- Order status breakdown
- Top 10 performing states
- Sales by channels (Amazon, Flipkart, Myntra, etc.)
- Age & gender relationship with orders
- Filters (Month, Category, Channel)

2. Data Analysis Insights

- Identification of high-value customer segments
- Regional performance analysis

- Channel contribution evaluation
- Customer demographic trends

3. Business Recommendations

- Targeted marketing strategies
- Channel optimization suggestions
- Customer segmentation approach

4. Final Analytical Report

- Summary of findings
- Key insights
- Actionable business decisions
